Exhibition „ Out to Sea? The Plastic Garbage Project“ as part of the aMORE Festival 2018

Francuski paviljon (Studentski Centar Zagreb) 16th May – 10th June 2018

"Out to Sea" is a traveling environmental multimedia exhibition which shows a large collection of ocean plastic waste. It is conceptualised by the Museum für Gestaltung in Zürich, the leading Swiss museum for design and visual communication, and supported by the Drosos Foundation. The exhibition, which has already seen many other capital cities worldwide, will be shown in Zagreb for the first time. "Out to Sea" presents alarming facts about plastic garbage found in the oceans and illustrates to the visitor its catastrophic ecological consequences. In addition, it examines possible solutions, which can be summarised around a series of R's - reduce, reuse, recycle, recover, rethink, redesign.
